Screwdriver Introduction

When turning the keyhole with the specialized screwdriver, it makes a lively and interesting 'click-click-click' sound.

Host Controller Introduction

1. Motor 1 Output Port

2. Motor 1 Button (Short Press for Clockwise, Long Press for Counterclockwise)

3. Power Button

4. Motor 2 Button (Short Press for

Counterclockwise, Long Press for Clockwise)

5. Motor 2 Output Port

6. Charging Port

Charging Instructions for the Host Controller

Connect the USB end of the charging cable to a power adapter, computer, or any USB-enabled digital device that supports charging.

Plug the Type-C end of the charging cable into the charging port on the host controller.

Precautions

- Regular Inspection: Regularly check the cables, plugs, housing, and other components for damage. If any damage is found, stop using it until it is repaired.
- The toy must not be connected to more than one power source at a time.
- The toy is not suitable for children under 3 years old.
- The toy should only be used with the recommended transformer.
- The transformer is not a toy.
- Do not alter the circuit structure. The toy cannot be used while charging.
- Use a charger with an output of 5V/0.5A for charging the host controller.

Remote Controller Introduction

How To Use The Remote Controller

Power Button

1. Re-pairing: Remove the battery cover and take out BOTH of the batteries. Then put them back inside. LED light flashes quickly meaning the remote controller is searching for a new host controller to be paired.
2. Short Press: Connect to a paired host controller.

Motor 1 and Motor 2 Continuous Rotation Buttons

1. Short Press after Power On: Motor rotates counterclockwise. (Red Light on the Motor 1 or 2 Button on the host controller)
2. Long Press after Power On: Motor rotates in clockwise. (Green Light on the Motor 1 or 2 Button on the host controller)

Motor 1 & Motor 2 Control Buttons

When the indicator on the Knob locates on the top, push the Motor 1 Control Button backwards and Motor 2 Control Button forward simultaneously to control the robot go forward.

When the indicator on the Knob locates on the top, push the Motor 1 Control Button forward and Motor 2 Control Button backwards simultaneously to control the robot go backwards.

Light Button (Feature Not Enabled) Motor 3 Control Button (Feature Not Enabled)

- #### Product Specifications
1. Connection Method: 2.4GHz
 2. Remote Control Range: Up to 15 meters under normal conditions

Battery Precautions

1. Non-rechargeable batteries should not be charged.
2. Rechargeable batteries should be charged under adult supervision.
3. Do not mix different types or old and new batteries.
4. Exhausted batteries should be removed from the product.
5. The toy must not be connected to more than one power source.
6. Rechargeable batteries should be removed from the toy before charging.
7. Ensure batteries are inserted with the correct polarity.
8. Battery terminals must not be short-circuited.
9. This product does not contain batteries.

1. Remove the battery cover from the back of the remote controller.

2. Insert two pcs of AAA batteries.

3. Reinsert the battery cover into the remote controller.

Connec the Remote Control to the Host Controller

Turn on the remote controller.

The red light on the remote will flash when it's powered on.

Press the power button on the host controller.

The blue light of the host controller will be on when it's powered on.

Bring the remote control close to the host controller. The remote and host controller will start pairing.

When the red light on the remote controller stops flashing, it's successfully connected to the host controller.
